

everteam.archive

In brief

.....

everteam.archive archive offers a unique platform to manage electronic, paper or hybrid archives. As a true governance tool for the company's information assets, the solution meets your needs for retention and securing binding documents, as well as for retention of large volumes of data or documents.

everteam.archive is the key to meeting regulatory obligations, application decommissioning needs or production application debottlenecking thanks to a wide range of powerful and modern connectors (SAP, Office 365, SharePoint, shared drives, messaging)

Why ?

.....

- **Simplify the archiving** of electronic and paper data and documents, while ensuring regulatory compliance and information governance
- **Debottleneck** costly production applications
- **Decommission** obsolete applications

Fields of applications

.....

Information Governance

everteam.archive allows you to manage, through a governance module, all contents in a single cross-functional solution which will accompany you as your organization evolves, however complex it may be.

Hybrid archiving

everteam.archive allows you to manage both physical and electronic documents in a single solution.

Probative value

everteam.archive has all the tools you need to secure and guarantee the integrity of archived documents in accordance with industry standards.

everteam.archive responds to the risk management and economic challenges of reducing storage costs by streamlining the archiving process.

Key functions

- **Single software** solution for all your archives, electronic (data, files) and/or physical (paper)
- Implementation of the **basic software requirements of NF Z42-013:2020 and ISO 14641-1, ISO 14721 (OAIS), ISO 15489, SEDA 2.1** standards.
- **Smart** search engine
- **Archiving policy management** module adapted to any type of organization
- Wide range of **analysis, remediation and transfer connectors**.
- **File analysis** and **sensitive data detection** module

Key Benefits

- **Powerful interfacing** with transferring applications and transfer **automation**, including support for the **SEDA 2.1 format**
- To preserve the company's information capital **regardless of the source or medium** (physical or electronic)
- **Ensure compliance** with the current regulatory, normative and legislative framework, including the **GDPR** related compliance maintenance requirement
- **Find useful information quickly whatever the volume**
- Have an **audited solution** that complies with good **security** practices (ASVS, OWASP)
